DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

1. Claims 1 and 3 are rejected under 35 U.S.C. 102(e) as being anticipated by Pan (6,542,092).

Regarding claims 1 and 3 pan discloses a multi-function wiring device 1 (See fig. 1) comprising: a first interface 2 for the insertion of a handheld device; at least one second interface for connecting a computer 3 or other peripherals via a corresponding transmission wire (See fig. 1) wherein the second interface is a RS 232 port or USB port; a first switch SW2 coupling to the first interface and the second interface for user

Art Unit: 2682

to manually select the second interface for external connection; and a second switch SW1 coupling to the first interface, second interface, and the first switch SW2, wherein the handheld device process data communication with the computer or peripherals while the second switch SW1 is pressed (See figs. 1-4 and Abstract, col. 2 line 58 to col. 3 line 5).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pan (6,542,092).

Regarding claim 2, Pan discloses as cited in claim 1. However, Pan does not mention that the handheld device is a PDA or Pocket PC. Official Notice is taken that PDA or Pocket PC is common in the art; therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to reconfigure the multi-function wiring device as disclosed by Pan to adapt PDA or Pocket PC for the advantage of expanding the application of the device to various types of mobile communication device.

Allowable Subject Matter

Art Unit: 2682

3. Claims 4-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Regarding claims 4-7, Pan discloses as cited in claim 1. However, Pan does not disclose a charging unit having a charging circuitry line coupling to a plurality of battery cell and a third switch coupling to the first interface and the charging circuitry.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
